

Discharge station of BIG-BAG

The BIG-BAG discharge station is designed for emptying bulk materials from BIG-BAG bulk bags. The material is subsequently dispensed to a designated point by a screw conveyor (eg multi-component weight).

The hanging cross with meshes ensures ideal bag position when emptying. The hanging cross is not designed for full suspension of the bag, it is not carrying!

Basic frame dimensions: 1500 x 1230 x 1000 mm
Base dimensions of the stand: 1440 x 1400 x 2700 mm

	Weight
Max. weight of BIG-BAGu (bag)	1500 kg
Max. load on the structure of BIG-BAG	1500 kg
